

ADEBAYO AJAYI

Newcastle, Tyne & Wear, UK | +44 736 652 9545 | ajayikingadebayo@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data professional with a First Class Honours degree in Geology & Mineral Science and a CompTIA Data+ certification, with hands-on experience across the full data lifecycle: extraction, transformation, modelling, orchestration and presentation. Independently designed, built, containerised and deployed a production-style ETL pipeline using Apache Airflow, Docker and AWS, and has delivered interactive dashboards in Power BI and Streamlit. Comfortable across Python, SQL and cloud fundamentals, with a methodical, evidence-driven approach carried over from a scientific background. A self-directed learner who has independently built and shipped a range of full data projects, from geospatial analysis to a cloud-orchestrated, CI/CD-tested pipeline.

SKILLS

Technical Skills

- Python (pandas, GeoPandas) — cleaning, transformation, geospatial analysis
- SQL (PostgreSQL/PostGIS, MySQL) — window functions, spatial SQL
- Apache Airflow — DAG design, TaskFlow API, idempotent pipelines
- Docker & Docker Compose — containerisation
- CI/CD — GitHub Actions (build, test, publish)
- AWS — S3, IAM (least-privilege policy design)
- BI & Visualisation — Power BI (DAX), Tableau, Streamlit, QGIS
- Excel — PivotTables, formulas, reporting
- Git / GitHub — version control, documentation

Professional Skills

- Strong Attention to Detail
- Clear Written & Verbal Communication
- Problem-Solving & Root-Cause Analysis
- Self-Directed Learning
- Methodical, Process-Driven Approach
- Stakeholder Communication
- Team Collaboration

PROJECTS

Full write-ups for these and further projects are on my portfolio site ([linked above](#)).

GP Accessibility Data Pipeline — Apache Airflow, Docker, AWS [\(view\)](#)

- Designed and orchestrated an end-to-end ETL pipeline as a 5-task Apache Airflow DAG with explicit task dependencies, extracting ward boundary and GP location data into a PostgreSQL/PostGIS star schema
- Implemented a Type 2 slowly changing dimension to track ward boundary changes over time; diagnosed and fixed a data-quality bug where non-idempotent runs were silently inflating results over 100x
- Containerised the pipeline with Docker and Docker Compose, and built a CI/CD workflow in GitHub Actions that builds, smoke-tests, and publishes the image to a container registry on every push
- Migrated source data to a private AWS S3 bucket secured with a least-privilege IAM policy; credentials handled via environment variables and kept out of source control

Tools: Python, Apache Airflow, Docker, Docker Compose, GitHub Actions, AWS (S3, IAM), PostgreSQL, PostGIS, GeoPandas

Healthcare Dashboard — Power BI

- Built an interactive Power BI dashboard analysing hospital billing, medication costs, patient distribution and service performance
- Designed the data model, wrote DAX measures and created clear, KPI-focused visualisations for a non-technical audience

Tools: Power BI, Power Query, DAX, Field Parameters

Staff Layoffs Analysis (2020–2023) — MySQL

- Analysed global staff layoff data from 2020 to 2023 using MySQL, cleaning and validating the data before identifying trends and reporting clear findings

Tools: MySQL, SQL, Window Functions, Data Cleaning, CTEs

RELEVANT EXPERIENCE

Volunteer Data Analyst | AfriExchange

Aug 2025 – Dec 2025

- Collected, cleaned and validated datasets to keep project data accurate and consistent
- Created Gantt charts and contributed to sprint planning within an Agile delivery team, tracking progress and reporting updates

Assembly Operative → Brake Press Operator | Grayson Thermal Systems

Oct 2023 – Aug 2026

- Tracked and reported production and quality metrics to senior management, adjusting the level of detail to the audience
- Maintained accurate production and quality records against strict technical specifications
- Acted as supervisor coordinating production schedules; promoted to operate Bystronic machinery for precision component manufacturing

Manager | Samtim Hairplace & Unisex Salon

Jan 2022 – Aug 2023

- Built monthly Excel reports to track sales performance, stock levels and purchasing requirements
- Analysed sales patterns to inform purchasing decisions and reduce stock management issues
- Improved the accuracy and consistency of business records by 5% through more disciplined record-keeping and checking

ADDITIONAL EXPERIENCE

Junior GIS Analyst Intern | StrongFoot Geophysical Services

Feb 2019 – Sept 2019

- Collected, processed and analysed geological and environmental datasets to support project requirements
- Validated datasets and maintained accurate project records to support quality assurance processes

Emergency Management Vanguard | National Emergency Management Agency

Aug 2021 – Jul 2022

- Sensitised members of the public on environmental health, sanitation and hygiene best practices
- Supported community outreach initiatives as part of a coordinated field team

CERTIFICATIONS

- CompTIA Data+ — June 2026
- Fundamentals of GIS (UC Davis) — December 2024
- Data Science Orientation — November 2024
- ALX Professional Foundations — August 2025
- Google Data Analytics Professional Certificate — March 2023

EDUCATION

BSc (First Class Honours), Geology & Mineral Science — Kwara State University, Nigeria — July 2016 – Dec 2020
