

ADEBAYO AJAYI

Newcastle, Tyne & Wear, UK | +44 736 652 9545 | ajayikingadebayo@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

CompTIA Data+ certified Data Analyst with a First Class Honours degree in Geology & Mineral Science and hands-on experience analysing, validating, and visualising data across SQL, Power BI, and Tableau. Delivered a Power BI healthcare dashboard, a Tableau retail BI project, and a MySQL layoffs trend analysis, alongside real-world reporting experience supporting Agile product delivery and business operations. Seeking to bring strong analytical thinking, technical range, and stakeholder communication skills to a Data Analyst role.

TECHNICAL SKILLS

Data & BI: SQL (SQL Server & MySQL), Power BI, Tableau, Excel (PivotTables, Power Query), Python (Pandas – basic)

Geospatial: PostGIS (Spatial SQL), Python (geopandas, osmnx), QGIS, Spatial Analysis & Buffer Modelling

Core Competencies: Data Cleaning & Transformation, Data Validation & QA, Dashboard Development, KPI & Business Reporting, Data Analysis

Professional: Analytical & Critical Thinking, Stakeholder Communication, Attention to Detail, Time Management, Adaptability

RELEVANT EXPERIENCE

Volunteer Data Analyst | AfriExchange

Aug 2025 – Dec 2025

- Analysed project data and produced progress updates to support Agile delivery planning across sprint cycles.
- Collected, cleaned, and validated datasets to improve the accuracy of product analysis and reporting.
- Built a Gantt chart to track product launch activities and keep cross-functional teams aligned on milestones.
- Collaborated with cross-functional teams during sprint planning and delivery activities in an Agile environment.

Junior GIS Analyst Intern | StrongFoot Geophysical Services

Feb 2019 – Sept 2019

- Collected, processed, and analysed geological and environmental datasets using GIS tools to support project requirements.
- Analysed spatial data and prepared technical documentation for client feasibility reports.
- Validated datasets and maintained accurate project records to support quality assurance processes.
- Produced maps and analytical outputs to communicate geographic information clearly to the data lead.

DATA PROJECTS

Healthcare Dashboard — Power BI ([view project](#))

Built an interactive Power BI dashboard analysing hospital billing, medication costs, patient distribution, and service performance. Developed data models, DAX measures, and interactive visualisations to support KPI reporting and data-driven insights.

Tools: Power BI, Power Query, DAX, Field Parameters, Bing Maps **Skills:** Data Cleaning, Data Modelling, Dashboard Design, KPI Reporting

Tata Business Intelligence — Tableau ([view project](#))

Developed an interactive Tableau dashboard analysing Tata retail sales data to surface revenue trends, regional performance, customer behaviour, and growth opportunities through exploratory analysis and calculated fields.

Tools: Tableau, Excel/CSV, Calculated Fields, Parameters **Skills:** Exploratory Data Analysis, Data Visualisation, Business Intelligence, Revenue Analysis

Staff Layoffs Analysis (2020–2023) — MySQL ([view project](#))

Analysed global staff layoff data from 2020–2023 using MySQL to identify workforce reduction trends, company shutdown patterns, and the organisations with the highest layoff volumes, using window functions and CTEs for ranking analysis.

Tools: MySQL, Window Functions, CTEs, Data Cleaning **Skills:** Data Preparation, Trend Analysis, Data Aggregation, Business Insights

Healthcare Accessibility Analysis, Newcastle upon Tyne — Geospatial ([view project](#))

Analysed GP surgery accessibility across Newcastle's 26 electoral wards by combining OpenStreetMap GP locations with ONS Census 2021 population data, using spatial buffer analysis to calculate GPs per 10,000 residents by ward. Identified Benwell &

Scotswood as the most underserved ward, consistent with its documented deprivation profile. Delivered findings as a labelled choropleth map in Python and a fully composed map layout in QGIS.

Tools: PostGIS, Python (geopandas, osmnx), QGIS, Spatial SQL **Skills:** Spatial Analysis, Geospatial Data Visualisation, Data Integration, Accessibility Modelling

CERTIFICATIONS

- CompTIA Data+ [\(view\)](#) — June 2026
- ALX Professional Foundations [\(view\)](#) — Aug 2025
- Data Science Orientation [\(view\)](#) — Nov 2024
- Fundamentals of GIS — UC Davis [\(view\)](#) — Dec 2024
- Google Data Analytics Professional Certificate [\(view\)](#) — March 2023

ADDITIONAL WORK EXPERIENCE

- Assembly Operative → Brake Press Operator** | Grayson Thermal Systems *Oct 2023 – Present*
- Promoted from Assembly Operative to operate Bystronic machinery for precision component manufacturing.
 - Use BySoft to develop machine programs and 3D bending models, ensuring adherence to technical drawings and tolerances.
 - Configure machine parameters and perform quality inspections to validate dimensional accuracy and product standards.
 - Act as supervisor to manage production schedules, coordinate team workflows, and report performance metrics to senior management.
- Manager** | Samtim Hairplace & Unisex Salon *Jan 2022 – Aug 2023*
- Managed daily business operations, including sales tracking, inventory monitoring, and customer service.
 - Created monthly Excel reports to track sales performance, stock levels, and purchasing requirements.
 - Analysed sales patterns to support inventory decisions and reduce stock management issues.
 - Improved the accuracy and consistency of business records by 5% through refined record-keeping processes.
- Emergency Management Vanguard** | National Emergency Management Agency *Aug 2021 – Jul 2022*
- Conducted environmental sanitation activities across Oshogbo city and surrounding areas.
 - Sensitised members of the public on environmental health, sanitation, and hygiene best practices.
 - Supported community outreach initiatives, engaging residents on environmental health risks.

EDUCATION

BSc (First Class Honours), Geology & Mineral Science
Kwara State University, Nigeria | July 2016 – Dec 2020
